Hi Pete - yes Deb Thomas is the right person.

Sorry for the late reply. Just got back from our trip.

Subject: FW: Example electronic submittal of WQS

***** **CAUTION:** This email originated from an outside source. Do not click links or open attachments unless you know they are safe. *****

Hi Pete, per my email message this morning, here's the example of Montana's electronic WQS submission if that's an option for you.

The attached cover letter lists the files submitted electronically via the state's file transfer service that support the WQS. The state had numerous supporting documents to include with the WQS so they used their state file transfer service, but any mechanism could be used (e.g. max.gov).

The email below confirms that the files were received by EPA. You could confirm prior to sending the letter to the RA that I received the WQS documentation.

Thanks,

Holly Wirick

Subject: Official submittal to EPA: MT selenium rule

Dear Ms Thomas,

I am pleased to submit for your review Montana's new water quality regulation. The rule addresses selenium water quality standards for Lake Koocanusa and the Kootenai River. Montana's submittal letter for the rule is attached to this email, along with a certification letter indicating the rule was duly adopted according to state law.

My staff has made the supporting electronic files referred to in the attached letter available to EPA via our File Transfer Service. Tonya Fish (Region VIII EPA) has successfully downloaded all of the files.

Again, I am very pleased to provide this new rule for your review. If you have any questions, please do not hesitate to contact me.

Sincerely,
Myla Kelly
